

IN THE CLAIMS:

Please enter the following amendments to the claims requested by the Examiner and set forth below in accordance with 37 C.F.R. §1.121(g):

6. (Currently amended) The lighting system of claim 1, wherein said lighting system ~~[[are]]~~ is configured to be used with a plurality of sets that is constructed to allow movement of the lighting system between and among the sets with said moving members.

7. (Currently amended) The lighting system of claim 6, wherein said plurality of sets ~~[[are]]~~ is constructed so as to have no shared walls.

11. (Currently amended) The set lighting system of claim 8, wherein said lighting system is configured to be used with a plurality of sets that ~~[[are]]~~ is constructed to allow movement of the lighting system between and among the sets with said moving members.

12. (Currently amended) The lighting system of claim 11, wherein said plurality of sets ~~[[are]]~~ is constructed so as to have no shared walls.

20. (Currently amended) The lighting system of claim 14, wherein said lighting system ~~[[are]]~~ is configured to be used with a plurality of sets that is constructed to allow movement of the lighting system between and among the sets with said moving members.

21. (Currently amended) The lighting system of claim 20, wherein said plurality of sets ~~[[are]]~~ is constructed so as to have no shared walls.

23. (Currently amended) A set lighting and production process comprising:

(a) providing a lighting system having:

(1) a first horizontal framework connected to a plurality of vertical members having upper and lower ends, said vertical members being horizontally moveable with respect to the framework so as to allow adjustment of the horizontal dimensions of the framework;

(2) moving means coupled to said lower ends for moving the system;

(3) a plurality of controllable fixtures connected to the framework; and

(4) a digital processor in electronic communication with the fixtures and adapted to remotely control the operation of said fixtures;

(b) providing a plurality of sets in a single location, said sets being arranged so as to allow movement of the lighting system between and among the sets;

(c) operating the moving means to move the lighting system to a first one of said plurality of sets for a first use therein, wherein, during said first use, the lighting system is movably stationed on the

ground, the moving means is in contact with the ground, and the horizontal framework is supported solely by said plurality of vertical members; and

- (d) upon completion of said first use, operating the moving means to move the lighting system to a second one of said plurality of sets for a second use therein, wherein, during said second use, the lighting system is movably stationed on the ground, the moving means is in contact with the ground, and the horizontal framework is supported solely by said plurality of vertical members.

26. (Currently amended) The process of claim 23, wherein the plurality of sets ~~[[are]]~~ is arranged in a configuration selected from the group consisting of a circle, a square, and straight rows.

27. (Currently amended) The process of claim 26, wherein said plurality of sets ~~[[are]]~~ is constructed so as to have no shared walls.

TERMINAL DISCLAIMER.

A terminal disclaimer in compliance with 37 CFR 1.321(c) is filed herewith (enclosed on a separate form) to overcome the Examiner's rejection based on a nonstatutory double patenting ground. The patent cited by the Examiner is commonly owned with this application.
